

Eric Gabbard

Seattle, WA 98136 | (847) 387-0469 | ericdgabbard@gmail.com | LinkedIn

SUMMARY

Head of Product with 9 years in B2B SaaS and fintech. Most recently owned the full technology roadmap at a venture-backed lender, aligning senior leadership, engineering, and capital markets on one prioritized plan. Builds AI-native product systems hands-on, from agent architecture to the governance model an org runs on.

EXPERIENCE

Backflip, Head of Product

May 2024 – August 2026

Venture-backed real estate lending fintech · ~50 people · Seattle, WA (Remote) · Promoted from Senior Product Manager

- Led a cross-functional pod through 10+ funnel A/B tests, driving +34% conversion and +26% loan applications on 10% less marketing spend in one quarter.
- Reframed a proposed cancellation as a cost-attribution problem: traced 75% of data volume to a sub-feature with no usage lift, killed it, and cut costs 90% via usage-based repricing. The product retained at 6.7x the rate of non-adopters.
- Greenlit and led a React rebuild of the loan dashboard, replacing the database middle layer with a direct CRM front end: time to close fell 27% (26 to 19 days), feature velocity roughly tripled.
- Ran the product function solo at a 50-person company by building an AI-native PM operating system in Claude Code: agentic skills wired across company tools that automate the role's recurring work end to end.
- Designed a three-variant loan application test against two opposed stakeholder agendas, defining a funnel-shape-neutral primary metric that blocked result-gaming; the winning arm led submission conversion 4.5% vs 2.0% over 25 days.
- Built the standard every AI agent at the company was authored against: reusable workflow components, an MCP server, and shared context between agents, letting non-technical teammates ship production agents without engineering.
- Built the ROI case to replace an unquestioned third-party draw-management vendor in-house, shipped the platform and migrated every in-flight loan onto it, cutting draw payout time 40%, from 3.5 to 2.1 business days.

Kasasa, Senior Product Manager

October 2017 – February 2024

Fintech SaaS for community banks and credit unions · 150–400 people · Austin, TX · Promoted 3x: Associate PM → Senior Associate PM → Product Manager → Senior PM

- Guided a cross-functional team to launch four new product variations end to end, achieving 75 sales in the first two quarters and \$1.2M in annual revenue.
- Partnered with analytics to isolate the account metrics driving profitability and launched a rewards program that increased profitable account behaviors 25% across the client base.
- Owned strategy, roadmap and feature design for a self-service support product, directing 5+ engineers and designers to expand client usage 12% and cut support tickets 10%.
- Oversaw a platform migration of 600 clients onto Kasasa's new SaaS platform and introduced internal tooling that cut support costs by \$250K.
- Built the roadmap prioritization framework adopted across product pods, aligning the executive team and stakeholders on complex cross-organizational initiatives.

Amazon Fulfillment, Area Manager

June 2016 – August 2017

San Marcos, TX

- Led a 90-member team to the top-performing shift in pack productivity, quality and outbound efficiency at what was then Amazon's benchmark fulfillment site.

SKILLS

Areas of Expertise: Product Strategy & Roadmapping, Product Vision & 0-to-1 Development, Generative AI Product Strategy, LLM Application & Agent Design, Regulatory & Compliance Navigation, Data-driven Decision Making, OKR & KPI Definition, Stakeholder Management, A/B & Multivariate Experimentation, Funnel Analysis & Optimization, User Research & Customer Insights, Cross-functional Collaboration, Go-to-Market Strategy, Product Lifecycle Management, Agile Product Development

Tools: Claude Code (agentic workflows, custom skills), MCP (Model Context Protocol), PRD authoring, BigQuery (SQL & analytics), HubSpot & HubSpot API, Salesforce, Zapier, n8n, Jira, Confluence, Figma, LaunchDarkly, MixPanel, FullStory, Pendo, Segment, Google Analytics

EDUCATION

Bachelor of Science, Industrial Management | Purdue University
Concentration: Operations & Supply Chain Management
